

Communication between Traffic Control Centers

Harald Reisinger, RNE CIO

Communication between Traffic Control Centers

Well working communication as key factor for efficient operations

Current situation:

- Different organisation of Traffic Control Centers
- Lack of rules and procedures for international communication
- Different degree of sophistication between IMs
- Often missing bilateral information exchange
- Language barriers

Communication between Traffic Control Centers

Several projects to improve communication are ongoing

Long Term	Implementation of TAF TSI and (later) TAP TSI	European Level
Medium Term	EUROPTIRAILS improvement and further roll-out	RNE Level
Short Term	Fast actions to improve communication	Bilateral Level

Fast actions to improve communication

Solve the most critical problems as soon as possible

Survey between Traffic Control Centers staff within RNE members:

Part A: Develop fast and easy solution for basic communication

Part B: Analyse further needs for improvement

Fast and easy solutions

Who is my communication partner and how can I „talk“ to him?

Operational Contact Database:

- Identify the right contact partner in neighbouring IM
- Provide the contact information to relevant partner

Catalogue for Multilingual Communication:

- Catalogue of predefined multilingual forms
- List of proposed solutions for multilingual communication
